The best JPG converters to PDF make it simple and easy to convert images into document files. JPG and PDF are both widely used file formats online, but sometimes you need to convert between them. Hundreds of online JPG converters to PDF exist, and it is even possible to convert from JPG to PDF using tools included on both Windows and Mac. That being said, PDF conversion software can make the process easier. Most online PDF converters allow you to convert only one image at a time. This can make converting hundreds or thousands of JPGs a laborious task. The best JPG to PDF converters have batch conversion, so you can combine multiple JPMs into a single PDF or create multiple PDFs from a folder of JPGs. Another useful feature is OCR (optical character recognition). An OCR converter can scan THE JPGs for text that you can then edit in the converted PDF file. In this article, we highlight our favorite JPG to PDF conversion software options. We presented the best free PDF editors and the best OCR software. By Cesar Castro PDF PDF JPG also referred to as JPEG, file formats are commonly used to save digital photos to a computer. File formats allow photos to be easily shared, edited, and used in photo editing programs. Converting a PDF image to a JPG file can be easily done with photo editing software. Find the PDF file to convert to a JPG file. Create a backup copy of the PDF file. Right-click the file and select Edit. Click Copy. Go to Edit Again and click Paste to create a duplicate of the PDF file. Open the photo editing software; examples are Adobe Photoshop or file conversion software, such as Universal File Converter. Click File, and then select Open or Import. Navigate to the PDF file. Double-click the PDF file to open it with photo editing software. Click Convert to File Conversion Software and select JPG as the output format. If you're using photo editing software, click File. Select Save As. Select JPG or JPEG as the output file format to save the PDF as a JPG file. In Windows, open JPG in Microsoft Paint, and then click File > Save As > PNG > Save. In Photoshop (Windows or Mac), go to File > Save As > Save As Type > PNG > Save. Or > export file > export as > PNG > Export. In Preview on Mac select File > Export > Export as Format > > PNG > Save. This article shows how to convert a JPG to a PNG using Microsoft Paint, Photoshop, and Preview (macOS). Alternatives are also discussed, including GIMP and online conversion tools. If you're using a Windows computer, you already have a built-in tool for converting JPG files to PNG. Microsoft Paint is preinstalled on Windows computers, and by using it, you can quickly convert a file from JPG to PNG. Open the file you want to convert from JPG to PNG to MS Paint, and then select File. On the menu that appears, hover over the Save As option, and then select PNG from the flyout menu that appears. In the Save As dialog box, select a location to save the file and type a name for the file, and then click Save. Then you will see MS Paint convert the file. If you don't want to use MS Paint on a Windows computer, or if you're on Mac and have Photoshop, that will do this trick for converting JPG to PNG as well. There are a number of ways to convert JPG files to PNG in Photoshop. The Save As menu is the easiest way to save a file in Photoshop in a different format than the original one. Open the file in Photoshop and select File. Select Save As from the flight menu that appears. In the Save As dialog box that appears, choose a location to the file, give it a name, and then click the Save as Type drop-down menu. From the list of available file types that appear, find and select PNG (*. PNG, *. PNG). Dont worry if the display window above the file name changes when you choose png format. That window will only display files with the same extension as the one you select. Click Save and the file will be saved in the new format. You can also convert JPG files to PNG during process in Photoshop. To do this, select File > Export > Export As, and in the dialog box that appears, select PNG from the Format drop-down menu. After you've made your selections, click Export. Like Windows, Mac has a built-in image conversion tool as part of its preview program. That means converting a JPG to PNG is as easy as a few clicks. Open the picture in Preview, and then select File. Preview is the default program for viewing pictures on your Mac, but if you changed the default viewer, you can always open the file in Preview by right-clicking the file, and then selecting Open with > Preview. On the menu that appears, select Export. In the Export As dialog box, add a name for the picture, choose where to save it, and then click the Format menu and select PNG. When you're done making the selections, click Save and the file will be saved as PNG. There are a lot of other free image editing apps available that will also convert JPG to PNG files if you need them to. For example, you can use GIMP to convert an image in the same way you use the Export option as in Photoshop. You will choose Export As, make sure the correct file type (PNG, in this case), is selected, and then click Save. The same goes for many other programs. In most cases, you'll have either an Export as option or a Save As option that will allow you to change the file type of image you're saving. If you are not interested in using the software that is installed on your computer, or in downloading an image editing file, there are many online services that will allow you to convert the JPG file to PNG. For example, JPG to PNG is a website that allows you to upload JPG files, convert them, and then you can download the new file. A note of caution if you plan to use an online converter. Be ware of the site you choose to convert the JPG file to PNG. Some disgusting sites will use conversion as a means of injecting malware into the file you download in order to infect your computer so that they can gain control over it or use it to push malware to others. Use only online conversion tools from sources you trust. PNG files are lossless so that they do not lose quality over time. They can also have transparent backgrounds. JPG files are lossy, which means that every time the image is saved, you lose a little quality. So sometimes a PNG format is better, depending on how you plan to use the image. Image.
